EDUCATIONAL BACKGROUND

Renmin University of China (RUC)

Bachelor of Economics | Overall GPA: 3.54/4.0

Beijing, China

09/2022-06/2026

PUBLICATION

Li, Z.*, Feng, S., Wang, Z., & Tian, Y. (2025). Impact of Trump's 2025 Tariff Policy on the Stock Performance of the American Technology Industry: An Event Study Analysis. *Advances in Economics, Management and Political Sciences*, 239,188-202. <https://doi.org/10.54254/2754-1169/2025.BL29343>

RESEARCH EXPERIENCE

Digital Investment and Productivity Paradox

02/2026-03/2026

Graduation Project | Supervisor: Prof. Feng Zhao, Renmin University of China

- Constructed a three-dimensional analytical framework integrating task-based and Marx-biased technological change theories to examine the productivity paradox of Digital Technology investment
- Built panel data models using Chinese A-share listed firms (2017–2024), incorporating multi-level interaction terms to identify the joint moderating effects of RTI, absorptive capacity, and labor income share
- Designed and implemented baseline, interaction, and threshold regression models, and addressed endogeneity using instrumental variables and system GMM
- Conducted data cleaning, variable construction, and regression analysis in Python and Stata

U.S. Tariff Policy and Stock Price Reactions in the Tech Sector

06/2025-09/2025

Team Project (Leader, 4 Members) | Supervisor: Prof. Oliver Linton, University of Cambridge

- Designed and implemented an event-study framework assessing the impact of Trump's 2025 China tariff policy on Apple and Tesla using CAPM and the market model; computed AR, CAR, abnormal volatility (AV) and cumulative abnormal volatility (CAV)
- Collected and cleaned firm-level and market data; wrote Python scripts to calculate α/β , derive abnormal components, and generate AR/CAR/volatility visualizations with results cross-validated in Excel
- Identified opposite AR/CAR responses and distinct volatility patterns, and linked the divergence to firms' production localization, supply-chain dependence, and tariff exposure
- Drafted the data & research design and AR/CAR analysis sections of the 15-page final paper, published in an academic journal

COURSE PROJECTS

Policy Impact of Universal Birth Liberalization on Labor Markets in China

01/2025

Team Project (5 Members) | Course: Econometrics, Supervisor: Lecturer Weize Chen

- Developed a three-pronged analytical framework assessing how China's universal birth policy may affect labor supply, female employment, and long-term economic growth
- Incorporated theories from labor economics, gender economics, household decision-making, and endogenous growth to frame causal pathways
- Designed three econometric models with clear dependent and independent variables, using threshold variables to model labor market rigidity and interaction effects
- Proposed a multi-source dataset combining macroeconomic indicators, labor force data, fertility rates, and human capital metrics from sources such as China's National Bureau of Statistics and the World Bank

Macroeconomic Reflections on China's Post-Reform Growth and Structural Challenges

06/2025

Individual Project | Course: Special Topics on Chinese Macroeconomy, Supervisor: Prof. Laijun Luo

- Conducted a comprehensive review of China's economic transformation since 1978, highlighting major

achievements in growth, industrial upgrading, trade, and employment

- Analyzed core driving forces including market-oriented reforms, industrial policy shifts, and external liberalization
- Identified structural constraints such as local government debt, labor market mismatches, and the erosion of demographic dividends
- Proposed a multi-tiered policy framework combining short-term stabilization, medium-term structural upgrades, and long-term innovation empowerment

INTERNSHIP EXPERIENCE

Yunnan Industrial Investment Fund Co., Ltd.

Kunming, China

Summer Intern, Investment Department

07/2024-08/2024

- Conducted research on prospective investment entities and compiled internal background analysis on fund structure, capital sources, and portfolio strategies
- Designed equity and fund structure diagrams for multi-layered investment vehicles, mapping capital contributions and LP-GP relationships across more than ten partner entities
- Assisted in formatting and editing internal investment guidelines, and co-developed workflow charts illustrating multi-stage equity and debt investment procedures
- Communicated with corporate representatives to clarify project details and gather supplementary information

Export-Import Bank of China (Yunnan Branch)

Kunming, China

Summer Intern, Credit Department (Customer Department I)

07/2023-08/2023

- Collected and organized company profiles and credit-related documents for internal assessments
- Participated in on-site visits to local firms, observing operations and supporting data verification efforts
- Conducted background research on local government financing vehicles (LGFVs) and studied the risk implications of urban investment bonds

EXTRACURRICULAR ACTIVITIES

Head of Design | Student Union, School of Economics, RUC

06/2023-06/2024

- Delivered design support for major school events, producing over 80 visual assets, including posters, illustrations, banners, postcards, and branded merchandise
- Edited and formatted four WeChat articles, balancing institutional tone with engaging visuals and layouts to enhance readability and reach

Member | Great Expectation Association (GEA), RUC

09/2022-Present

- Participated in consulting training workshops, collaborating on business case analysis and report writing
- Led a team in the YSI (Young Sustainable Impact) & GEA Startup Camp, proposing and refining a venture idea; completed a business plan and Lean Canvas, and delivered a final venture pitch

Participant | “Thousand Villages” Rural Field Program, RUC

07/2022-08/2022

- Participated in a university-led fieldwork initiative exploring poverty alleviation and rural revitalization
- Conducted site visits and informal interviews with villagers and local officials in Mangyao Village, Yunnan, to understand development challenges and community responses
- Compiled policy background and field observations into a report linking national strategies to local development

TECHNICAL SKILLS

Python, R, Stata; MS Office Suite, Adobe Photoshop, Adobe Premiere Pro
